

# Strict Clinic Hygiene Under Covid-19

WE follow strict hygiene protocols already, however due to the changes in regulations regarding Covid-19 we have increased our safety measures to comply, to ensure everyone's safety and minimise the risk

Your Health & Safety in Paramount

## Strict Cleaning Procedures

We will be cleaning and disinfecting our work space thoroughly after every client as usual, however we will need to allow extra time in between each client for extra measures

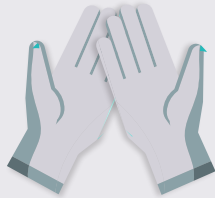

## Washing Our Hands

We always wash our hands in between each client and use anti-bacterial hand sanitiser to prevent cross contamination

## Disposable Items

We ensure that everything we use on you is disposable and single use only and will be disposed of correctly

## Wear Full PPE

We will be wearing full PPE throughout your treatment, including mask, gloves and aprons. These will be disposable after each client.

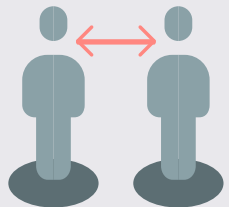

## Clinical Waste

We follow strict waste disposal to avoid cross contamination at all times

## Socially Distance

We will be socially distancing with other members of staff and clients to minimise risk

## Risk Assessment

The clinic has had a thorough risk assessment to address potential risks relating to Covid-19 and have protocols in place to address and resolve any potential issues

## Symptoms

If we experience any symptoms, we will be in contact to reschedule your appointment immediately
